Abstract

The relations between Federal Russia and Central Asia Islamic Republics (Kazakhstan ,Uzbekistan ,Turkmenistan ,Tajikistan ,and Gargyzstan)

Yazan Awad Alwardat

Mu'tah University,2011

The aim of this study is to examine the relations between Federal Russia and Central Asia Islamic Republics (Kazakhstan, Uzbekistan, Turkmenistan, Tajikistan, and Gargyzstan) , identify the most determinants and factors affecting this relationship after the collapse of Soviet Union and after Federal Russia has become the legal inherit of this empire during (2010 -1991) . By using both historical and analytical descriptive approaches, results of the study indicated the following conclusions:

Many factors have determined the relationship between Russia and Central Asia Islamic Republics, and these were both internal and external, difficult to separate from each other except for study purposes, which affected these relationships differently .

The geographical and economic determinants were the most influential on these relationships, and what was derived from them such as security considerations as these Islamic Republics possess many nuclear war heads Russia attempt to remain in these republics as their return to Russia will be a threat to its economy. Furthermore, these republics possess many natural resources (oil, gas, minerals) and Russia attempts to be the only beneficiary of the.

Russia works on protecting these Islamic Republics from radical (fundamental) Islamic movements protect them from regional and foreign interferences as they make its strategic depth.

Russia will not accept the domination of regional powers (Turkey and Iran) or foreign domination (USA and EU) on these republics as this will be a serious breach for its national security.
